OUR SUPERIOR METHODS AND PROTECTIVE CARE

Skillfully used in Garden Planting bring the grace,
grandeur and romance of generations past
within a modern garden wall

THOSE WHO KNOW and love Old English Boxwood —
who have seen its dense, dark green foliage sprinkled
with snow in winter or have caught its delicate, dis-
tinctive fragrance after a warm spring rain — need no intro-
duction to its charm.

To you, we extend the opportunity to enjoy this charming old
shrub. Our collection affords us to say “quality in quantity.”
Each perfect specimen dense with healthy and luxuriant
foliage.

Careful planting is the policy strictly adhered to in our land-
scape planting service. As has been the custom of this Nursery
for the past 26 years, we guarantee all our Boxwood to live and
thrive.

SUGGESTIONS, ESTIMATES, DESIGN and IMMEDIATE EFFECT LANDSCAPING FOR YOUR BOXWOOD REQUIREMENTS

OPPORTUNITY KNOCKS

Presenting still the **BEST** for **LESS**

We have acquired many imperfect specimens (thin one side, hole in side, etc.). While not quite as grand as our perfect specimens, these plants can be adapted to settings of real grandeur.

Through our expert handling and the additional time, study and arrangement of an imperfect box, your setting will have the added exquisite charm of that of a perfect specimen. This extra beauty is acquired through the use of evergreens in the form of a bank. Typical settings are corners, recessed or sunk-in gardens, retaining wall approaches, and arch entrances. Prices have been drastically reduced.

AMERICAN BOXWOOD

(*Buxus Semperviren*)

COMMON OR TREE BOXWOOD

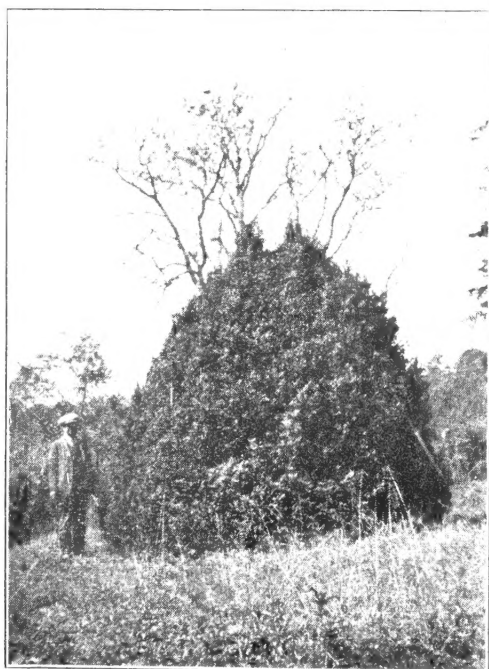

Known as Semperviren Boxwood, the American Box, unlike the Old English Dwarf Box, can be pruned and shaped.

Truly, American Box holds a fine place among shrubs. It is the only plant to approach the qualities of Old English Dwarf Box.

The American Box is used quite extensively in plantings for institutions, hospitals, public buildings, colleges, golf courses, amphitheaters, parks, and the like. They also are placed well on estates and in gardens.

Inquire for your needs.
